AWDD

Academy of Web and Digital Design

The Academy of Web and Digital Design

The Academy of Web and Digital Design provides students with the opportunity to combine concepts of print and web media in the creation of various printed materials and web sites to display the work. Students will take Web Design and Digital Design courses where they will use industry standard software while integrating academic courses for a hands-on curriculum.

Careers Include:

- Graphic Arts
- Web development
- Digital publishing
- Logo Designer
- Brand Identity Designer

Mission:

Provide students with an opportunity to combine the concepts of print and web media in order to utilize their communication skills to convey a message, become proficient with industry standard software, and collaborate effectively in a professional environment.

Vision:

Provide student with rigorous or relevant academic coursework teamed with career and technology courses that will position them at the forefront of technology advances.

Goal:

- Developing community partnerships
- Integration of curriculum

Application Process

- Maintain a 2.5 GPA
- No referrals and all 1's in conduct
- 10 hours per year in an after school program
- 30 additional Community Service Hours for Bright Futures
- Participate in academy events in school and in the community

Adobe Certification

At the end of the program, AWDD students will take an exam to test their ability with various Adobe Programs. Students that pass the test will become Adobe Certified which is an industry standard of excellence. Obtaining this certification is the best way demonstrate proficiency in leading products from Adobe.
